

STRISSE

Sisteme Tirant Regolabil Individuâl Semplic Sigûr Ecologic
(Ecologic Safe Simple Individual Regulable Tie System)

- Printing instructions:

- open your favorite slicing software;
- open the provided STL file;
- set the model flat on surface;
- set desired infill percentage (range 50% to 100%);
- set bed temperature: 50°C (please, for better results check the recommended temperature for your specific type of PLA);
- set extruder temperature: 200°C (please, for better results check the recommended temperature for your specific type of PLA);

- How to use:

Set your mask's strings in place on both sides of the strap as shown in pictures.

Example with three different types of strings in place (on one side):

Examples of strap in use:
